YOUR DREAM OUR PASSION

JAVA INTERNSHIP TASKS

Interns may be tasked with implementing algorithms, building applications, or contributing to existing codebases. The goal is to gain hands-on experience, improve Java skills, and demonstrate problem-solving abilities in real-world scenarios.

STUDENT GRADE TRACKER

Develop a program that allows a teacher to enter students' grades and compute their average, highest, and lowest scores. You can use arrays or ArrayLists to store the student data.

TRAVEL ITINERARY PLANNER

Create a travel itinerary planner that allows users to input destinations, dates, and preferences to generate a detailed travel plan. Include features like maps, weather information, and budget calculations.

ONLINE QUIZ PLATFORM

A Simple Banking Application in Java is an ideal project for coding beginners. It covers fundamental concepts like the Scanner class for input, strings, loops, methods, and conditional statements. This project involves basic banking operations such as deposits, withdrawals, checking balances, and exiting the program.

HOTEL RESERVATION SYSTEM

Build a hotel reservation system where users can search for available rooms, make reservations, and view booking details. Include features like room categorization and payment processing.
